

Graduate Study in Astrophysics Rutgers, the State University of New Jersey

- + Nine faculty members doing forefront theoretical and observational (X-ray through radio) research on topics that include cosmology, dark matter, dark energy, galaxy evolution, gravitational lensing, supernovae, interstellar turbulence, stellar populations, and time-domain astronomy.
- + Membership in the Atacama Cosmology Telescope (ACT), Legacy Survey of Space and Time (LSST), Simons Observatory (SO), and Southern African Large Telescope (SALT) consortia.

X-ray+optical image of the supernova remnant SNR 0509-67.5 in the Large Magellanic Cloud. X-ray emission (green) from Warren & Hughes (2004); optical emission (red) from Hovey et al. (2015).

- + Application deadline January 1st.
- + All GRE scores (general and physics) are optional.
- + Access to state-of-the-art high-performance computing cluster.
- + Student stipends and tuition paid by research+teaching assistantships.
- + Dedicated astronomy course sequence + research-focused candidacy exam.
- + Location conveniently close to New York and Philadelphia.
