

Book Launch

Abraham Loeb and Steven R. Furlanetto

THE FIRST GALAXIES IN THE UNIVERSE

Please join us for a lecture and book signing by

Avi Loeb

Director, Institute of Theory and Computation
Chair, Astronomy Department, Harvard University

“The First Galaxies in the Universe”

Friday, February 1st, 2013

Philips Auditorium

Lecture and Q&A - 2:00 to 2:45 pm

Refreshments and Book Signing - 2:45 to 3:30pm

<http://press.princeton.edu/titles/9914.html>

“This book provides a comprehensive, self-contained introduction to one of the most exciting frontiers in astrophysics today: the quest to understand how the oldest and most distant galaxies in our universe first formed. Until now, most research on this question has been theoretical, but the next few years will bring about a new generation of large telescopes that promise to supply a flood of data about the infant universe during its first billion years after the big bang. This book bridges the gap between theory and observation. It is an invaluable reference for students and researchers on early galaxies.” Princeton University Press
